(9) Special distributions per share are not included in the dividend yield and dividend payout calculations
(10) Total shareholder return is calculated as the change in share price plus dividends and special distributions paid in the current period as a percentage of the prior period's closing share price, assuming reinvestment of all dividends
(11) The price to earnings multiple is calculated based on the end of period share price and 12 -month trailing diluted EPS.

We are also including mutual fund and segregated fund trailer revenue in this calculation. This method of calculating fee-based revenue may differ from approaches used by other companies and therefore may not be comparable. Historical figures prior to $\mathrm{Q} 4 / 08$ have been restated
